

WPA Conference Abstract

Il sogno della farfalla: A journal of psychiatry as psychotherapy.

Andrea Masini

My speech will tell the story, which has been lasting for more than 30 years, of the journal of psychiatry and psychotherapy, *The Butterfly's Dream*, a name that hints at its unicity.

Set up by psychiatrist Massimo Fagioli in 1991, the journal is regularly released 4 times a year.

It covers main cultural and scientific topics, publishes articles pertaining to Massimo Fagioli's Human Birth Theory, and materials and evidence drawing parallels and having assonances with it.
